School: Providence English Private School		
Group: a		**Sex:** Male
Date of test: 07/05/2025	**Level:** 9	**Age:** 9:00

What is *Progress Test in English*?

PTE provides a series of age-appropriate tests for teachers to use year on year to ensure that students are making and maintaining good progress in some of the more technical aspects of English (like punctuation) and in their understanding of what they read (comprehension).

The test is in two parts – English Skills and Reading Comprehension.

English Skills cover spelling, punctuation and grammar. Reading Comprehension is based on an age-appropriate fiction text and a linked information text.

Description of profile

- Aser Feras Jamal Badran's profile of scores from *Progress Test in English* indicates an even profile, with similar scores for both English Skills and Reading Comprehension.
- Aser Feras Jamal Badran is performing at or above age expectations across the curriculum for English. To further help him to become an independent and enthusiastic reader, Aser Feras Jamal Badran should be encouraged to extend the breadth and depth of his reading, developing his understanding and enjoyment of stories, poems, plays and information books across a wide range of topics. Encourage Aser Feras Jamal Badran to keep a reading diary, write a blog or create a slideshow presentation of his thoughts and opinions about the books.
- Where possible, offer opportunities for Aser Feras Jamal Badran to write for a range of real purposes, encouraging the use of more adventurous vocabulary and more varied sentence structures to express his ideas.

Note: In the table above, the yellow shading represents the average range.

What is *Progress Test in Maths*?

Progress Test in Maths (PTM) is a series of age-appropriate tests for teachers to use every year to ensure that students are making and maintaining good progress in mathematics. Each test assesses aspects of mathematical skill and knowledge, together with the key process skills of fluency, mathematical reasoning and problem-solving.

The *PTM* series consists of twelve tests: 11 tests covering the age range 5 to 15+ years (*Progress Test in Maths* 5 to 15), plus an additional test for pupils aged between 11 and 12 years, which can be used as a transition test on entry to secondary education (*Progress Test in Maths* 11T).

- For the youngest children (*PTM5*, *PTM6*, *PTM7* and *PTM8*) the teacher reads the questions and the answer options aloud so that the need to read is minimal.
- *PTM8* to *PTM14* tests are in two parts: Mental Maths, and Applying and Understanding Maths. Mental Maths questions are timed and played from an audio file (or read by the teacher). Applying and Understanding Maths questions are answered at the student's own pace.

Profile

Progress Test in Maths			

Description of profile

- Aser Feras Jamal Badran needs to develop maths ability further. This can be done through regular practice and by deciding which areas are causing the greatest difficulty.
- Help Aser Feras Jamal Badran in maths by asking to see school work and talking about it. Ask Aser Feras Jamal Badran to explain an answer and the thinking behind it. Lots of maths practice can be found in the home, such as money calculations when shopping, weights and proportions in cooking and in estimating lengths, weight, capacity and volume. Encourage Aser Feras Jamal Badran to play maths games online, as these give a lot of routine practice in a fun way.

Note: In the table above, the yellow shading represents the average range.

What is *Progress Test in Science*?

Progress Test in Science provides a series of age-appropriate tests for teachers to use to ensure that students are making and maintaining good progress in science. The test provides a reliable assessment of a student's knowledge and understanding of science, as well as their application of this knowledge and understanding. The concept of 'working scientifically' is also addressed.

The *PTS* series consists of two Forms: the original form (Form A), and the new form (Form B). Form A consists of 7 tests: 6 tests covering the age range 8 to 14+ years (*Progress Test in Science* 8 to 14), plus an additional test for pupils aged between 11 and 12 years, which can be used as a transition test on entry to secondary education (*Progress Test in Science* 11T). Form B consists of 6 tests covering the age ranges 8 to 14+ years.

Description of profile

Aser Feras Jamal Badran demonstrates a level of knowledge and understanding in science below that expected for his age.

Supporting learning at home

- Use science-based educational websites to improve Aser Feras Jamal Badran's understanding of topics being studied at school. Spend time together watching video clips, reading topic summaries and having a go at the quizzes.
- Talk about science with Aser Feras Jamal Badran. Try to find engaging ways to explore science in the home or when you're out and about. There are plenty of examples of fun science activities on the internet (e.g. growing a cress head, making an air rocket, building a bug palace or making a lava lamp). These experiments use items you would expect to find in the home or can buy easily. Find experiments online that have step-by-step instructions with diagrams (and some video clips) and include explanations of "what's happening?" or "how does it work?".
- Encourage Aser Feras Jamal Badran to think about science in everyday contexts. Take opportunities to ask questions like "What would happen if …?" to encourage him to be inquisitive and seek out answers (e.g. "What will happen to the sugar if we mix it in the water?"; "Where's my shadow in the morning/midday/afternoon if I stand in the same spot?"). Try to show Aser Feras Jamal Badran that science isn't just a subject, but it is a way of understanding the world around us.

Note: In the table above, the yellow shading represents the average range.
